

## Teksam is looking for an AI employee

### Technical documentation & spare parts catalogues

Do you want to help digitize and scale our technical documentation in the mechanical engineering industry? We are looking for an **AI employee** to build and maintain **spare parts catalogues and user guides** for our machines and plant installations.

The AI employee becomes an integral part of our technical organization and works closely with engineering, service and aftersales, at our location on the northwest coast of Denmark.

---

### About the job

As an AI employee in technical documentation, you focus on structuring, analysing and maintaining complex technical data throughout the machine's life cycle – from design and delivery to operation, service and retrofit.

You support our employees by automating documentation tasks and ensuring high quality, consistency and traceability in our technical material.

---

### Your primary areas of work

#### Spare parts catalogues

- Building and structuring spare parts catalogues for machinery and plant installations
  - Structuring machines in logical hierarchies (*machine* → *module* → *subsystem* → *component*)
  - Compilation of data from PDM, ERP, CAD and historical sources
  - Linking spare parts to machine types, variants, serial numbers and revision levels
  - Support for exploded view drawings, position numbers, and compatibility
- 

#### User manuals and service documentation

- Generation and maintenance of:
    - Operator's manuals
    - Installation and commissioning instructions
    - Service and maintenance manuals
    - Troubleshooting guides and safety documentation
  - Structuring documentation according to mechanical engineering standards
  - Consistent use of technical terminology
  - Customizing content for operators, technicians, and service personnel
-

**We imagine that our new AI employee:**

- Have a strong understanding of technical documentation in the mechanical engineering industry
- Can handle complex data volumes and product structures
- Works systematically with consistency, version control and reuse of content
- Supports multilingual documentation
- Is integrated with PLM, ERP and CAD documentation systems

If you have any questions, feel free to send an email Bo Stenumgaard [bos@teksam.com](mailto:bos@teksam.com) and we will get back to you as soon as possible. Applications are accepted until June 12'th 2026.
